How do I find more partners and projects?

Collaborations Around the Planet
http://projects.twice.cc/
CAPspace is a social networking tool for educational videoconferencing. Create and advertise your own collaborative videoconference projects to educators around the world. CAPspace also provides registration for collaborative events and projects such as TWICE's Read Around the Planet. There are currently 14155 educators from 56 countries registered with CAPspace. Email notifications are sent daily.

Center for Interactive Learning & Collaboration – Collaboration Center
http://www.cilc.org/Collaborations.aspx
The CILC Collaboration Center is the venue for educators to meet, create a collaborative project, and share their reflections. Search current and past collaborations or post your own collaboration. Posted projects are emailed to the CILC mailing list on Mondays. Sign up for an account to receive the emails.

K12IVC Listserv
https://groups.google.com/forum/#!forum/k12ivc
CILC maintains this listserv. This listserv is the fastest way to get a collaborative partner. It is not moderated, so your messages go out immediately. Once you join, the easiest way to post to the group is to send an email to k12ivc@googlegroups.com. [ListServs are automatic e-mail servers. A listserv uses a mailing list program for communicating with other people who have subscribed to the same list.]

Awesome Community for Videoconferencing (AC/VC)
http://ac4vc.blogspot.com/p/membership.html
ACVC is open to anyone using videoconferencing as an "instrument" to "rock" K-12 students and staff. The goal is to meet four times per school year to share updates and challenges, as well as projects and ideas. Currently on hiatus. Will be back in 2017!

Your Professional Learning Community
The idea behind a PLC is professionalism "based on specialized knowledge and a focus on serving client needs" and community "based on caring, support, and mutual responsibility within a group." You can grow your PLC within your campus/district or use social tools such as Twitter, Edmodo, or organizational websites. Your PLC is a great "place" to reach out to for partners and to assist with project development.
