

123VC Evaluation Report - June/July 2008

<u>Evaluation Items</u>	<u>Answers</u>	<u>Number of Answers - June</u>	<u>Number of Answers - July</u>
The three pre-class reading assignments helped set the stage for the first day.	Strongly Agree	5	17
	Agree	10	42
	Disagree	1	1
	Strongly Disagree	0	2
	I didn't read them.	9	35
Modeling and doing the different videoconferencing scenario activities provided me with a solid understanding of videoconferencing.	Strongly Agree	23	64
	Agree	2	32
	Disagree	0	1
	Strongly Disagree	0	1
Please rate the following videoconferencing scenario activities:			
<i>Exchange Projects</i>	Great	22	77
	Good	2	17
	All Right	0	3
	I didn't do it.	1	3
<i>Math Marvels</i>	Great	15	73
	Good	8	17
	All Right	1	3
	I didn't do it.	1	3
<i>MysteryQuest</i>	Great	23	90
	Good	2	5
	All Right	0	1
<i>ASK</i>	Great	20	85
	Good	3	8
	All Right	0	2
	I didn't do it.	0	1
The video clips helped further my understanding of how videoconferencing works.	Strongly Agree	11	65
	Agree	13	32
	Strongly Disagree	1	0
Please rate the following videoconferencing video clips:			
<i>Virtual Field Trips Take Off</i>	Great	10	60
	Good	11	22
	All Right	0	4
	I didn't see it.	4	11
<i>Math Marvels</i>	Great	11	70
	Good	9	20
	All Right	1	2
	I didn't see it.	4	5
<i>MysteryQuest</i>	Great	18	85
	Good	6	11
	All Right	0	1
	I didn't see it.	1	0
<i>ASK</i>	Great	17	87
	Good	7	8
	All Right	1	1
	I didn't see it.	0	1
The afternoon presentations provided me with some valuable information.	Strongly Agree	18	61
	Agree	6	35

123VC Evaluation Report - June/July 2008

	Strongly Disagree	0	1
Please rate the following afternoon presentations:			
<i>Andy Campbell, Dale Hilton & Arielle Lexine - "LEARNco and Cleveland Museum of Art"</i>	Great	19	74
	Good	6	21
	All Right	0	1
	I didn't see it.	0	2
<i>"Teacher Testimonials"</i>	Great	3	35
	Good	12	40
	All Right	9	20
	I didn't see it.	1	2
<i>Tonya Murro, Lisa Inks - "Global Nomads Group - Pulse Program: The Future of America: 2008 U.S. Presidential Elections"</i>	Great	12	70
	Good	10	18
	All Right	3	8
	I didn't see it.	0	1
<i>Jim Wenzloff, Janine Lim - "ASK: Author, Specialist, Knowledge"</i>	Great	18	85
	Good	7	12
	I didn't see it.	0	1
<i>Shane Howard, Janine Lim - "Singing with Shane" & Kigluait Adventures, CAPspace</i>	Great	21	69
	Good	4	21
	All Right	0	7
	I didn't see it.	0	1
I enjoyed working with people from a distance on our class project.	Strongly Agree	18	82
	Agree	7	15
	Disagree	0	1
I felt comfortable meeting with my class project group through videoconferencing.	Strongly Agree	19	63
	Agree	6	31
	Disagree	0	4
Using the blog was a good way to reflect about our experiences in the class.	Strongly Agree	12	46
	Agree	13	46
	Disagree	0	5
	Strongly Disagree	0	1
I plan on signing up with at least one of the videoconferencing listservs that we discussed.	I already did!	8	42
	Yes	15	45
	I'm not sure.	2	10
	No	0	1
Moodle was a good way to host and deliver the class information.	Strongly Agree	16	48
	Agree	8	47
	Disagree	1	1
	Strongly Disagree	0	1
GoogleDocs was a good way to publish the group project information.	Strongly Agree	16	66
	Agree	8	29
	Disagree	0	2
I see the benefit of using videoconferencing with my students.	Strongly Agree	24	86
	Agree	1	10
The length of the course was...	Too Long...I was ready to go home on Monday morning.	0	1

123VC Evaluation Report - June/July 2008

	Good...although I would like to have had a little more time.	21	66
	Good...although I would like to have had a little less time.	4	20
	Too Short...I would like to have had much more time.	0	9
Please evaluate the overall knowledge of the facilitators.	Very knowledgeable	23	94
	Knowledgeable	2	3
I found the content of the training session to be...	Very relevant to my job	20	74
	Relevant to my job	5	21
	Somewhat relevant to my job	0	3
Would you recommend the 123VC course to others?	Yes	25	96
	Maybe	0	1
	No	0	1
Overall, I found the 123VC course to be...	Very helpful	24	88
	Helpful	1	9
	Frustrating	0	1

Answers - June

Answers - July

If you could modify one thing about 123VC what would it be, and how would you do it?		
	Have a little bit more of an introduction on the first day.	An intro time with our Region to learn documents, passwords, chromo/equipment, getting to know everyone in our group, and all the other important info just to run a VC. Otherwise I loved everything!!! Thanks
	I love this course... I am so glad that I participated in this..	Because of the time differences, we were not afforded a full hour for lunch. It was too much for me because I was starving by 11:00! Maybe next year, you could add a little more time to the second break.
	I would like to have a verbal over view, (for those of us that aren't that tech savey).	Better organization, more skilled presenters, less boring downtime and more time working on projects. I learned very little from this workshop.
	I would like to have had more time working with small groups.	Divide the small groups more evenly--some seemed too big to work well, and mine was a little small (4 people).
	I wouldn't change a thing!	Everyone did a wonderful job! Thanks so much! We are so fortunate to attend such an amazing staff development for FREE!!!
	I'd would like to see a photo directory of the participants with contact info. We really only got to know the people in our group.	Have it longer so I would feel more knowledgeable about each of the technologies.
	More data in the packet about how VC works o.e., equipment, bridges and the tech stuff for it all. Clearer information and instructions (or time to explore) the google.docs and skype etc.	I can't think of anything.....less snacks so I won't be tempted maybe????
	The schedule worked very well.	I don't do well with "inventing" material on the spot. I would change the expectation for people to come up with material during the class. I personally need more preparation and reflection time. Really TRIVIAL example: running around trying to find beach props on less than 24 hours notice.
	To show us how to get connected up to some of the providers from our own computers.	I don't know- we got so much useful information and so may resources showed to us- perhaps there could be a follow up in 6 months to see how much we have used and retained.
	Updated technology - hardware and wireless. I would have enjoyed learning more from Janine Lim as well - we kept our expert so busy with coordination that I'd hate to put any more work on her but I'd love to learn more from that creative brain of hers!	I felt there was a little too much down time.
	I think a little more time would have been helpful. Jumping right in was helpful because it really helped us to become focused quickly. I would have liked to have some explanation of the Polycom equipment and how it all came together.	I really can not think of anything to change.
	more international sites	I sometimes felt overwhelmed by too much information coming at me too fast. I don't have a great background in technology, so I have a hard time processing all the terminology.

123VC Evaluation Report - June/July 2008

yearbook - pictures and contacts	I think it was good. It could be 4 days.
Thought it worked great!	I think it was great the way it was.
We really had fun setting up our Mystery Quest but then other groups said our clues were too hard, although everyone got the right answer. (We were sort of depressed after that feedback.) Another group put almost no effort into their presentation and chose a location that was not within the scope of the assignment. Their clues were also not helpful in leading us to the location. In a real class situation..is there a rubric or more detailed instructions for the participating sites?	I think the class went very smooth and I would not change much. However the day of the testimonials was very difficult to stay focused. I would replace the testimonials with some other way of connecting students. Or use an extra day to spot light successful vc experiences via video.
I would pre arrange future workshop days every so often so that we could all get together and share ideas and keep in contact as a group. I feel I forged some excellent links on both continents and want to keep them going! Cheers, Ingrid	I think there needs to be time set aside for us to learn about the equipment itself and how it will work at our schools. (how to hook it up...)
I worked very well	I thought it was great, and I wouldn't change anything.
Have a better live introduction of the course, it's format, and the participants. I did not understand the format, i.e. that the other sites that we only saw in the afternoon were also doing the activities and I did not feel a good connection to the other people until Thursday!?!	I thought the Teacher Testimonials would have been better done with visuals like a PowerPoint or a simulation.
After the first few days....I feel like I really got the hang of how we would use videoconferencing in our district...then working on the project was very helpful...so maybe 3 days might have been enough time. BUT I have to say that time did fly by because we were having so much fun! Our facilitators in Humble were awesome!	I truly enjoyed this week and am very interested in bringing Pasadena ISD in on it next year.
	I wanted more technical information. Overview of the remotes, how to connect the units, etc.
	I would have 2 or 3 pre on site activities or group lessons to set up the diferent accounts. Setting up the accounts took up a lot of learning time.
	I would have liked to had just a training session on the running of the equipment and ordering videoconferences. I think I would have been a little more comfortable with this session then.
	I would have more comfortable chairs.
	I would have more small group work.
	I would like more experience with the camera operation...I do not think I am ready to do this on my own.
	I would like to add more time to share the collaborations. I felt like we were not able to give a complete share of the information from the collaboration. However, if all the collaborations are posted someplace we will be able to get the full concept of all the projects.
	I would like to have a little more time. Maybe add another day.
	I would modify skype. I would give participates more time to skype and maybe use audio.
	I'm new at this, so I can't think of anyway to make it better.
	It has been one of the best trainings I have had and I have had many.
	It would be nice to have this program offered during the year (on weekends or during the evenings maybe) so more educators can have access to it.
	Later start time
	Limit number of groups/sites to no more than 6. Not a strong criticism, though. This was a complex program, very well organized and well managed. Impressive and enjoyable.
	Make it last a little shorter.

123VC Evaluation Report - June/July 2008

	Maybe a quick 101 on how to use the technology in the room that had to be used for presentations.
	More hands-on experience with the equipment. I feel comfortable with the remote, but not with navigating between the image being projected off a laptop screen, the Elmo or a whole group shot. I also would have liked to have seen how the cart is set up and the entire process of beginning a VC once you have all the equipment. Everything else was absolutely wonderful and just participating in the activities generated so many thoughts and ideas for implementation in my own classroom. Thank you so very much for everything!!!
	More low fat food at lunch.
	More time for the presentations
	More time to work on small group projects More rules set for the small group projects.
	More time with the group project.
	N/A
	Nothing that I can think of.
	Nothing. It was perfect!
	Nothing. It was perfect.
	See how familiar everyone is w/the doc.google, Skype, etc An evaluation form
	Since I took the class during the summer, I would have preferred it taking up fewer of the summer vacation days! Heh
	Since I, technically, would be "Roxanne" in my room, I would want to be Roxanne for a day. I will have to know more, technically, than just participating in the events.
	Some of the small groups do not need to be too large
	The small groups at times did not allow each person to contribute in some instances....it worked itself out in the long run.
	The teacher testimonial need more interaction, it just all muted together
	There was a lot of information for everyone to learn and in a very short time. Those of us who have a longer learning curve need a little more time for each of the new items.
	Those who are very familiar with the equipment should not be able to use the remote but can instruct those who need the practice. It just seem like those who were used to this venue kinda took over.
	To be honest, I do not know.
	Trouble getting into blog is my only discontent.
	We needed a little more time on Thursday and Friday for working on our small group project. We had a difficult time working "together."
	Went well, and am leaving feeling very informed. No suggestions to add.
	allow more time for small group project planning
	give more time for the group projects, 7 minutes is not enough
	improve the connections and the sound quality
	it would be interesting have people from the same subject all in one group.
	more practice with the websites
	nothing
	nothing at this time
	perhaps a little more info on Monday was needed, for me anyway, on use of vc equipment before we began
	reduced # of people in small group.

123VC Evaluation Report - June/July 2008

<p>Please describe the most valuable experience you feel that you had while participating in the 123VC course.</p>	<p>ASK with Don Alsbro</p>	<p>Actually signing up for the different jobs and making a presentation with another group: the hands on; also, being able to see others' ideas. The sessions were developed in a great time frame.....the day went quickly and always ended on a positive note.</p>
	<p>Content provider were very valuable. Resources shared from everyone are great.</p>	<p>All technology sources used such as gMail, google docs sharing, skype.</p>
	<p>Creating a project with another group. Loved Shane and Andy!</p>	<p>All was valuable, I'm so thankful for this opportunity!</p>
	<p>Developing the project with another campus and realizing how easy it is to have this relationship and to have the dialogue face to face was terrific. All of the experiences were good, everything was valuable to the overall experience and the goals of the session.</p>	<p>Being exposed to the world of teleconferencing, and realizing that it is not difficult to do. That gives me encouragement to use it in the classroom.</p>
	<p>Getting up-to-speed on such things as googledocs, blogs and skype. Also, the sense of interconnection between participants that I don't want to lose. I may not keep in contact with these same people but definitely plan to form my own cohort with which to collaborate!</p>	<p>Besides learning the basics, it was good to see that it doesn't have to be perfect. It's OK to make mistakes---they are just opportunities to learn!</p>
	<p>I got the most value out of being an active participant in all of the projects.</p>	<p>CAPSpace! Use of Skype--because I used it a lot, I got more comfortable with it. Googledocs-same as with Skype</p>
	<p>Now that is a difficult one. Listening to Don Alsbro was exceptional for me and talking with you guys came a close second!</p>	<p>Collaborating with other educators around the country, and the ASK project was especially interesting!</p>
	<p>Introduction to new technology of all sorts.</p>	<p>Collaborating with other teachers from different areas. It made me realize there are more people who want to be chiefs than Indians, but with a little flexibility and understanding of people's personalities, it all works out in the end.</p>
	<p>learned as well as believe that vc can be a meaningful learning experience for students</p>	<p>Creating the VC and then ASK</p>
	<p>Showing us what possibilities there are out there.</p>	<p>Discovering the different providers and the group project. The group project helped me understand how the students may feel while preparing for and participating in their videoconference.</p>
	<p>Participating in the various simulations and hands on activities.</p>	<p>Experiencing actual videoconferences as opposed to making up something--those have to come out fairly artificial.</p>
	<p>students to participate in. The Aldine district is made up of 82% at risk students and most of our students have very little life experiences to draw from. This will open up the world to them. THANKS for all you are doing to help with those connections!!</p>	<p>Going through the small groups collaborative process.</p>
	<p>The most valuable experience was learning from teachers around the USA and outside, as well as being able to plan future projects with them and get a lot of ideas from them. I also enjoyed and learned very much from some of the presentations that we did and am looking forward to finding more of</p>	<p>Getting more comfortable with the technology.</p>
	<p>How small the world has become!</p>	<p>Getting to try out so many different things, and also share with others.</p>
	<p>The overall experience helped to structure learning I had already picked up from other places.</p>	<p>Getting to use the vc equipment i.e. remote, switching from document camera to presentation slides, etc. The content I learned was amazing. So many things to do, so little time to use them in!</p>
	<p>There isn't one set experience. I learned SO many valuable things it's almost hard to remember them all. ASK, Alaska, Wales. . .</p>	<p>Got to hear presentations from around the country in the comfort of our own city.</p>
	<p>really getting to know the other teachers and planning possible future projects. Much easier now links are already made.</p>	<p>Hands on is always a good thing for most learners.</p>
	<p>Showing us what possibilities there are out there.</p>	<p>Hooking up with other sites and learning all the info</p>

123VC Evaluation Report - June/July 2008

Working with a group overseas was fun and I think the students would find it very interesting.	I am new to VC so it would be learning how to use the equipment and how to VC successfully with other groups. I really like meeting so many new people from all over our country and having that resource to share with the teachers. I also like how you can VC for FREE. With budgets getting tighter it is good to know there is more than one way to be successful.
group collaboration	I believe collaborating with other teachers was great! The teachers that I worked with at Region 7 felt like family. We felt like we were leaving good friends at the end of the conference.
the whole experience	I feel I can do videoconferencing and do it comfortably. I have so many ideas, I don't where to start :-).
Finding out that there are extremely great connections for VC!!!	I learned a lot this week. I hope to remember everything haha...well not everything but at least the necessary info to be able to do at least ONE VC this year!!!! I am very excited about doing VC this coming year.
	I loved all the new technology and websites that we explored.
	I loved the programs that we watched to help us understand vc
	I loved the whole course and have learned so many new things. I am so excited to get back to school and try to implement VC into my curriculum. I have thought of so many ways VC could be used in my classroom as well as a great resource for some students that are on home instruction for various reasons. Being able to do VC to them at home could be a great benefit. I also am interested in finding other high school special education classes that would be willing to do VC activities with me. I am justed all JAZZed up to go back to school.
	I really enjoyed the small group project where we worked together on a final presentation.
	I really enjoyed the small group work this session. It so happened that we had a very personable group and got along well.
	I thought the ASK program was really the most valuable experience, we were able to learn more about veterans and learn ways that we could incorporate their insight into our classroom.
	I'm a beginner so everything was so important.
	LOVED exposure to q&A with the NAM vet, meeting wonderful colleagues, having actual participation in vc events instead of just watching a video of them.
	Learning about all the resources available to make videoconferencing a success.
	Learning about the equipment and meeting all the people.
	Learning all that I learned was valuable because I have never done VC before.
	Learning new technology.
	Learning to collaborate with others in other areas.
	Learning where to set up video conferences
	Lots of practice on programs I have heard abt. but not used: google docs, skype, moodle. This was a wonderful advantage of this program. Good intro to new and useful sites: Twice Collobarations etc.
	Most of us got close enough to call on each other for help and will contact each other thru the next year for help and support. It was a very cohesive group!
	Plan, plan, plan. Do not change any thing at the last minute.
	Project work

123VC Evaluation Report - June/July 2008

	Seeing the different collaboration programs in action. I've heard of Math Marvels, Global Nomads, ASK, and MysteryQuest but had not seen them. I'm looking for a way I can incorporate them into my vcing.
	Sharing. Sometimes I feel alone in my pursuit of more IVC's
	Small group discussion
	Small groups - working with others across a VC unit
	Some of the sites I found out about will be very helpful.
	The ASK program was very interesting and thought provoking, and would be very valuable for students.
	The class as a whole was a very valuable experience!
	The collaboration was awesome....too many cooks can spoil a meal.....but that was not the case. Everyone brought something to the table and it worked.
	The collaboration with another site in creating the group project was extremely beneficial. It allowed me to network with other teachers/schools and helped me to feel more comfortable being on camera.
	The contacts that were made. I loved actually being a participant in videoconferences. I now have an experience that I can relate to and feel that my students would benefit from it.
	The entire conference
	The experience of planning a vc with another site that we can actually use this upcoming school year.
	The feelings when talking and working with others, like being in the same room.
	The hands on training was the most valuable for me.
	The most valuable experience for me was seeing the VC from museums with the demonstrations. It gave me ideas for doing those types of VC with my science classes.
	The most valuable experience that I had was meeting people from different states. I am so happy to have had the opportunity to meet the people in our small group from El Paso.
	The most valuable experience was being able to actually connect with other sites and collaborate with them. Even in other states. This showed how easy it is to collaborate with people outside of our area.
	The most valuable experience was collaborating with the other sites and the participants of our own group.
	The most valuable experience was sharing ideas with other teachers from different areas of the US.
	The most valuable experience: I worked with GREAT PEOPLE! I learned a lot about videoconferencing. Thanks a lot!
	The most valuable thing was working together with this group in Lamar.
	The nomads group and the ASK program.
	The opportunity to collaborate with other teachers from other states.
	The running of the remote and dialing up the group project people.
	To actually do this hands-on (virtually) and be able to see all the great ways of using this.
	To meet and work with different people from all over the U.S.
	Working in small groups
	Working with my group
	Working with people outside our school district and working within and meeting new people. Overcoming the fear of video conference.

123VC Evaluation Report - June/July 2008

		actually presenting gave you appreciation for using all the equipment
		Meeting all of the people from the other cities and regions
		just the knowledge gained throughout this whole process
		learning different technologies and seeing how they can create student enthusiasm for learning
		learning the different ways to use VC and giving us access to all of the sites
		meeting new people with different views
		participating in the different videoconferences
		reaching out to others. This will make students understand that others like them are experiencing the same things.
		seeing how easy it is to use this technology.
		simulations in the mornings
		when hearing shane doing the picture
Please share anything else you would like. We value your feedback	Awesome job!!!!!!	Awesome week. Can't wait to try it out.
	I really liked this course and find in it a very valuable teaching tool. I'm looking forward to doing at least one or two videoconferences this year.	Consider changing sites
	I think this week was very positive. Everyone was positive and supportive. Thank you for a job well done.	E-mail list of EVERY name that participated.
	I thoroughly loved this class and I'm so depressed that it's over! I'll miss it! Thank you! Thank you! Thank you!	Edit #13 question to say it was just the right length.
	I will definitely recommend this class to other members of my campus and encourage them to have a video conference with another school in another part of the country or the world.	Fantastic experience
	Thank you all for showing me that VC can be very interactive and thank you all for all of your dedicated hard work.	Fast paced but I survived!!
	It was a very good wee. Our staff has learned a lot and are already using what they have learned in the classroom.	Good job to all. thank you.
	Look forward to working with the world on many projects. We carry out a lot of work with Operation Christmas Child and the shoeboxes for Christmas. We would like to share our lessons globally on this, as I know you take part in this too.	Great Inservice. I really enjoyed it!
	The instructors were amazing and the training was very well organized and fun!	Great Job! I found this class very helpful and easy to apply the new skills in my classroom.
	It only gets better. I am so happy to have been a part of this training. Can't wait to start on some of these projects. Facilitators were GREAT!	Great job, I can not say enough about Jodie and Melodie in our area, and a special thanks to the other facilitators, Ken and Rene for help with the Group # 5 project. Thanks very much, and I really have learned a lot from this session.
	would love to do it again!	Had a great time, I know we will be in touch.
	This course is super! Teachers just need to get over their fear of trying out the technology and then we'll be fine. (I'm speaking for myself, actually)	I am already planning to present my class project with Michigan via videoconferencing in the fall.
	This is a great professional team making Jazz work at all sites!	I am impressed by all of the people and their knowledge of technology.
	This was a wonderful experience! I learned so many ways to use VC that I did not know about before.	I am sorry that our small group project did not end on a positive note.
		I appreciate all of the expertise that is at our fingertips. Please stay on the cutting edge of technology!
		I cannot think of anything negative. As you know this is my second time to spend a week with you and I have loved all the time I spent here. I would drive everyday to work with Shane and Roxanne if I could.
		I enjoyed the entire workshop. Thank You

123VC Evaluation Report - June/July 2008

	I felt this program was very well paced and wouldn't change its pacing at all! Kudos to EVERYONE who participated!
	I found the elementary teachers are definitely more creative! As the grade level requirements become tougher to accomplish, videoconferencing can be a way to relieve some of the pressure on the teachers. Thank you for a great session!!!!
	I learned so much about different sites and how to insert, change and copy pictures. Learned so much more about computers. Also I know I definitely will use vc this school year.
	I look forward to looking at all the resources available to us.
	I loved the training, Lori is very knowledgeable and helpful. It was a wonderful learning experience. THANK YOU AGAIN!!
	I loved this...I want to have time to use it with my students.
	I really enjoyed this session. I got a tremendous amount of information and hope that I can utilize it to make me an awesome VCer.
	I really like that several districts within our area was included in one group. Not just one school district. I was able to see how technology is being used in other districts rather than just my own.
	I think the small group time could be extended. All of our small group work had to be done at home.
	I think the the length of the course was really OK.
	I thought the conference time was perfect. Question #15 didn't allow for that response. I plan on incorporating videoconferencing in my classroom. Thank you for the workshop. It was great! I wish the virtual field trips were less expensive. I would like for all of my six classes to participate in these activities.
	I thought this was a great workshop and I love that I am leaving with so many contacts and ideas to go back to use with my students. Thanks so much!!!
	I understand students who do not want to be on the conference because I do not like being on or talking to large groups via the videoconference - makes me very uncomfortable. Small group work was fine. I enjoyed that.
	I would very much like some best practice lessons that have been used among our district. Ones that have been used by our fellow teachers and have gone well! More one to one lessons that we can do --- they are great and free!
	If I could take this class again, I would. It is one of the most practical classes I have ever taken. I took it because I want to use videoconferencing more in my social studies classes.
	It was a really great conference.
	It was great!
	Kathy Mohr was a wonderful facilitator. She is so knowledgeable and the things she has been and continues to be involved with are awesome. I hope to have her set up some VC opportunities for my classroom this year.
	Ken was an excellent presenter. He was organized, concerned that we understood what we were studying, and did not go "over my head" using tech words. He broke things down so that I could understand them.
	Let's have another Jazz one notch up!
	Loved it - thanks for all of your hard work, facilitators!!
	Lunches were Great! Thanks Ken.

123VC Evaluation Report - June/July 2008

Many thanks to all that put in many hours in the planning, planning, planning...technology troubleshooting and being just plain weird :)
Originally, I thought, "what have I gotten myself into?" Although I was hesitant about being overwhelmed with information, from the first day to the last day, I felt like the material was introduced in such a way that it was easy to follow and understand. I would recommend this to anyone in a heartbeat
Rox and Shane are Wonderful and go to http://www.shanehoward.com
Roxanne was a GREAT facilitator!!! Even though I was stressed out before coming, I had a successful and positive week. I am SOOOO excited about utilizing this at my school! Shane and James were great support. I will feel very comfortable calling for support. Thanks so much for everything you did to make me feel comfortable and capable.
See above
Thank you SO MUCH for helping us to understand this and see the great potential. Very valuable!
Thank you for all the best practices, tips, and exiting ways to exite our students!
Thank you for the valuable information. The week started slow and I was concerned. I do hope our district can integrate this type of program into our curriculum.
Thank you to Ken and October for facilitating this conference. Your patience was wonderful when dealing with failing connections, stubborn computers, and clueless teachers! :)
Thank you very much!
Thanks for presenting this program. It is terrific for introducing a variety of uses of VC + other technologies for both teachers and vc practitioners. Really enjoyed it.
The collaboration was wonderful even though there were some potholes in the road of learning.
The workshop showed me once again how powerful and valuable vc'ing is. I've done a lot of conferences the past 8 years and have become ambivalent (sp?) about it. This workshop reminded me of what a cool job I have. Wanted to be a fireman except I was afraid of ladders.
There are endless possibilities with video conference. Thanks to Ashton for her professionalism.
This has been a wonderful experience and I am excited about using this in my classroom.
This training allowed me to experience VC hands on and diminish the fear of being able to get my students involved in being part of Video Conferencing!
This was fun and a non-threatening way to learn new stuff.
This was great and Jody Ingram did a great job.
This was very informative, but I do think I wouldnt have been so lost if I could have just concentrated on the things that I am going to know for my media postion.
Very upbeat and the food was GOOOOOD!
We plan on doing some Jazz activities after school this year.
enjoyed the food and really enjoyed the group of teachers we were with loved the interaction and great ideas
everything was great!
more-more-more!
