	Having time to practice and process. Thank you! I also loved getting to hear Don Alsbro.	I think actually trying the videoconference equipment during small group and running the camera during various lessons was very helpful. Having local time to research and sign up for programs was wonderful. This kept down any feelings of anxiety and allowed us time to ask our facilitator the hundreds of questions that we asked over the 5 days. I loved the videoconferences in the a.m. & p.m. as well.
	Helping to create a videoconference project that can be implemented.	The overall view of videoconferencing and the examples shown for each type was great. I liked having a few examples each day, and using the morning to have time to actually do themso many good things
	I loved the whole thing!!! Janine is AWESOME!! She is invaluable!!! I learned too much to mention!! Thanks!	Just simply collaborationg with people in other states was a blast and very informational to me. Of all of the vc experiences we had, I liked the Mystery Quest the best.
	The most valuable thing is always getting to work with other educators and making contacts outside of my own school district.	The most valuable experience was the small group work. It helped to make connections and helped me gain an appreciation for all the work people put into a videoconference.
	Creating our own collaborative project was most valuable because it made it accessible.	Janine as the coordinator was absolutely awesome. The experience you get with all the programs is absolutely amazing.

This was an excellent workshop. My expectations were exceeded, and I learned a LOT. A five day workshop is long, but that amount of time is necessary to really learn well. One thing I really appreciate is that you didn't cram too much information in in too short a time. I never felt information overload, which frequently happens in two day workshops. Thank you for a great experience. I think there should be a few more breaks, we didn't leave this room for the entire week. Our lunch was even brought in and we had working lunches. TOO MUCH I did not necessarily know what to expect from this class, only knowing that the potential of the Internet is ever-growing. I felt I needed to take a class to get myself up-to-date outcational application of the Internet. More access to the equipment used at our school. Overall a great workshop that I owld recommend to others. It really opens the world to the students. Thanks for all the hard work and time put in by the facilitators in preparation for a great session. It hink that everyone should take this course and learn what the future holds for our students using technology for alternative learning tools. I think maybe have more time going over the equipment, maybe have everyone pick a day that they can use the remote so that we can learn how to use it. This is certainly something that I feel is worth sharing with all teachers. I feel that we would be able to build a strong network just in EPISD if we could share this knowledge with others. Thanks for all your hard work. N/A

Try not to overwhelm teachers on the first day by putting them on the
camera right away. Spend more time talking about the benefits first and
let the teachers "buy into" the vc concept. N/A
Overall this was a great in-service. I can't wait to start my students off
and running with VCing. N/A
Thank you to Ashton, Becky and Sherita for your time, patience and
guidance during the week. You are all apprecitated. THANKS!!!!!!!
I felt that a lot of the programs displayed and shown on the website are
targeted for younger kids, but I feel confident that I will be able to adapt it
to fit my classes and share/aid other teachers in doing so as well. For
instance, I have already begun planning a VC debate with a class at Silva
over Biomedical Physics. N/A
